

Husqvarna AY

Husqvarna AY is a series of powerful, durable and economic pneumatic concrete vibrators. Powered and cooled by compressed air it is ideal for vibrating walls and columns. The easy-to-twist ball stop handle delivers maximum efficiency and helps avoid air leakage and power losses. The absence of moving parts in the hose reduces hand/arm vibrations and extends service life.

Ergonomic design

The absence of moving parts in the hose reduces vibrations in your hands and arms and extends service life.

Ball-stop handle for maximum efficiency

The easy-to-twist ball stop handle helps avoid air leakage and power losses.

Wide variety of applications

High centrifugal force (12,000 vpm) and acceleration makes pneumatic vibrators ideal for everything from concrete lab tests to dam construction projects.

Long service life

The air-cooled design means reduced wear and increased life-time.

FEATURES

- Wide variety of applications
- Ball-stop handle for maximum efficiency
- Ergonomic design
- Long service life
- High quality delivers high performance

Technical Specifications

SPECIFICATIONS	
Vibration value	2.91 m/s ²
DIMENSIONS	
Hose length	1.5 m
Tube weight	17.7
PACKAGING	
Packaging length	800 mm
Packaging width	600 mm
Packaging height	150 mm
Packaging volume	72 dm ³
