

Husqvarna SVE

The SV electric modular truss screed is ideal for large surfaces. High profile aluminum frames gives 30 % weight reduction compared to BT 90 and ensures portability and productive usage in high to medium slump concrete. Designed for up to 25 m wide floors and handles depths of up to 150 mm. Can create a slab at the speed of one metre per minute. Applications are for example tunnels, roads and large depots. Easy to assemble by a single operator and adjust camber. Many configurations possible with accessories, such as winches and outriggers, to cover your day to day needs.

Engineered to last

Triangular frames, and square tubes provide better rigidity. Oscillating bearing with grease nipples extend the product life-time and serviceability.

Easy setup

Easy to assemble by a single operator.

Smart design

A precision turn-buckle allows to camber the screed sections independently.

Even, continuous pull

Winches on both sides equipped with 30 m of steel wire allows work on long span without stopping.

FEATURES

- Smart design
- Easy setup
- Engineered to last
- Even, continuous pull
- Easy to transport
- High productivity

Technical Specifications

ENGINE	
Output power (As rated by the engine/motor manufacturer)	2.2 kW
PACKAGING	
Packaging length	1200 mm
Packaging width	800 mm
Packaging height	1400 mm
