Features for PP 492

Flexible and efficient

Thanks to that multiple products can use the same power pack, you will increase your efficiency. You will need less machines at the job site and it will be faster to set up all machines on one power pack.

Compatible with the PRIME™ product range

PP 492 is designed to be used with PRIME™ handheld tools and drillmotor in addition to WS 400 series in order to help you on site. For instance when cutting a door opening, this modular system can handle both wall saw cuts and over cuts.

Minimum slurry

Automatic water valve minimises the soiling of water and slurry.

A powerful high frequency power pack

A powerful high frequency power pack providing fast and accurate adjustment for each operating condition.
