

Husqvarna A 2000

A 2000 is one of the most advanced portable air cleaners available on the market. It is tested and certified for use as both an air cleaner and a negative air machine. Thanks to a reliable filter system and a design that is perfectly matched to operation with HEPA class H13 filters, that are tested and certified at an efficiency rate of 99.99% at 0.3 microns, the air cleaner puts out superior air quality – be it when dealing with concrete dust, fine sanding dust or gypsum dust. It has two warning lights to indicate when the filters are clogged or leaking. Operates at two very quiet speeds. Thanks to the compact design, the unit is easy to move and transport. Non-marking, lockable wheels allows for easy transport.

Motor

Phases	1~
Voltage	230 V
Rated current	3,3 A
Rated input power	0.75 kW

Specifications

Air Flow, m ³ /h	2000 m ³ /h

Features for A 2000

Durable design

Lightweight cabinet with sturdy aluminium frame and metal locking casters. A metal mesh protects the filter area.

Warning lights and sound

The yellow light warns of a clogged filter, the red light warns of filter leaks.

High efficiency over time with two-stage air filtration

A large filter area in combination with pre-separation give long operation time with high efficiency. A pre-filter made of pleated polyester catches the larger dust fractions before the air enters the individually tested HEPA H13 filter ensuring 99.99% efficiency at 0.3 microns.

Easy to clean HEPA filter

The HEPA filter is protected by a metal mesh which makes it easy to vacuum it without damaging it.
