

Husqvarna C 3000

C 3000 is an effective industrial pre-separator for really big jobs where a lot of dust is produced. Recommended as a supplement to your Husqvarna dust extractor S 26 and S 36. C 3000 separates 90% of the vacuumed material before it reaches the dust extractor, which greatly increases the suction capacity, extends motor life and significantly reduces the frequency of filter maintenance, thus giving you longer operation without interruption. Using a pre-separator enhances the dust extractor's capacity to handle material that would normally be considered difficult to manage such as soot, burning particles, liquids and light material in large quantities. The Longopac® bag hose system ensures simple, dust-free bag changes. Can be used for both wet and dry applications.

Specifications

Container capacity	37 l
--------------------	------

Dimensions

Product size height	1580 mm
Product size length	590 mm
Product size width	730 mm
Weight	22 kg

Features for C 3000

Durable design

Corrosion-resistant steel clamps, welded frame with dust bag platform and durable steel handle make it ready to serve for many years.

Easy to transport

The welded frame enables easy transportation by resting the machine on the frame.

Increased productivity

The pre-separator prolongs the dust extractor's filter life and maintains higher airflow over time, resulting in greater dust pick-up, a cleaner work environment, and longer time between filter cleaning.

Clean and simple bag change

The Longopac® bag hose system ensures simple changes of the bag without any dust spills.
