

Husqvarna T 4000

T 4000 is an effective 3-phase industrial dust extractor to match the grinding machines Husqvarna PG 530, PG 450 and PG 400 as well as small to medium scarifiers, shot blasters and shavers. Ideal for heavy-duty work and exacting demands on dust extraction. T 4000 is equipped with a quiet, yet powerful turbine motor delivering exceptional airflow. The machine can deal with materials that are difficult to handle, such as grinding dust and demolition materials in a wide variety of applications. Has a reliable filter system with high collecting efficiency and a long filter lifetime, and can deal with large quantities of fine dust. Comes with two individual tested and certified HEPA filters, class H13, and a massive cone-shaped pre-filter providing high productivity and a long service life. The pre-filters can be cleaned from outside of the tank via Jet Pulse negative air pressure. The Longopac[®] bag hose system ensures simple, dust-free bag changes.

Motor

Phases	3~
Voltage	400 V
Max. vacuum	260 mbar
Rated input power	4 kW

Specifications

Air Flow, m ³ /h	400 m ³ /h
Max. vacuum	260 mbar
Water lift	104 in

Dimensions

Product size height	1500 mm
Product size length	830 mm
Product size width	620 mm
Weight	106 kg

Features for T 4000

Efficient filtration system

The three separate filtering stages result in longer working time between filter cleaning. The dust is filtered through a cyclone chamber, which separates the heaviest parts, up to 95% of the dust, before the washable main filter. The HEPA micro filters are individually tested and certified to capture 99.99% of the remaining silica dust in the respirable fraction (0.3µm).

Easy and efficient filter cleaning

The Jet Pulse filter cleaning system ensures high continuous airflow thanks to easy and efficient cleaning of the conical main filter without opening the machine.

Durable design

Corrosion-resistant steel clamps, welded frame with dust bag platform and durable steel handle make it ready to serve for many years.

Excellent stability and mobility

The slim design, solid non-marking tires, swivel casters and hitch for attaching a separator allows for excellent mobility and stability.
