

Husqvarna BMP 215

BMP 215 is electrically powered and perfect for all types of small to medium-sized applications. This machine is compact, powerful and durable. It comes equipped as standard with a complete drum with cutters. Husqvarna scarifiers are designed to be easy to use and maintain, extending the efficiency of the operator doing the job with minimum vibrations or stress. We offer a full range of scarifiers and scarifying tools, which give the opportunity to process any floor and specific application.

Precise height adjustment

The working depth of the drum is easily adjustable, this means no underground deterioration. Quick lifting/lowering of the milling drum mechanism.

Centred down force

This scarifier is built so that the weight of the machine is centered in order to create a maximum down force on the rotating drum.

Plug and scarify

With the single phase scarifier, you don't need any special electrical system. Just plug in and scarify.

User friendly

This machine is easy to manoeuvre, with minimum vibrations and features a dust hose connection with a 51 mm diameter for minimised dust exposure on the site.

FEATURES

- Plug and scarify
- Centred down force
- Precise height adjustment
- User friendly
