

Husqvarna BMS 150

BMS 150 is ideally suited for medium and large-sized applications. It's a fully electrically powered machine with an automatic power cable system with turning cable arm. It is very manoeuvrable with a zero turn radius and non-marking tires. This floor scraper comes equipped as standard with a dust hose connection of 76 mm diameter. It is possible to connect a small or medium-sized dust collector to prevent dust exposure in the working area. Depending on the type of flooring material you would like to remove, you can choose from a wide range of blades or chisels. This floor scraper is able to remove most (old) floor coverings such as linoleum, vinyl, carpet, adhesives, glue, etc.

Quick release tool

You can choose from a wide range of blades or chisels. The quick release tool holder allows you to change or replace the blade very quickly.

Easy to manoeuvre

This floor scraper is very easy and user friendly to manoeuvre. The buttons on top of the joysticks move the blade up and down.

Easy to transport

The cable system can be folded up in two positions to enable lower height when transporting. It even fits into a small vehicle.

Automatic power cable

Forget about the cable - it automatically winds itself up. With 25 meters of cable, you have a cordless feeling. Just plug and go.

FEATURES

- Easy to transport
- Easy to manoeuvre
- Quick release tool
- Automatic power cable
