

## Husqvarna BMP 215PETROL

BMP 215PETROL is perfect for all types of applications, due to a petrol engine which is specially suited to small to medium-sized outdoor jobs. This machine is compact, powerful and durable. It comes equipped as standard with a complete drum with cutters. Husqvarna scarifiers are designed to be easy to use and maintain, extending the efficiency of the operator doing the job with minimum vibrations or stress. We offer a full range of scarifiers and scarifying tools, which give the opportunity to process any floor and specific application.

### Precise height adjustment

The working depth of the drum is easily adjustable, this means no underground deterioration. Quick lifting/lowering of the milling drum mechanism.

### Centred down force

This scarifier is built so that the weight of the machine is centered in order to create a maximum down force on the rotating drum.

### Petrol powered

The petrol motor allows the operator to work outdoor at any time, as you don't require electrical power.

### User friendly

This machine is easy to manoeuvre, with minimum vibrations and features a dust hose connection with a 51 mm diameter for minimised dust exposure on the site.

## FEATURES

- Petrol powered
- Centred down force
- Precise height adjustment
- User friendly
