

## Husqvarna Blastrac EBE 350EX

The Blastrac EBE 350EX steel blaster is perfect for small and medium sized jobs preparing horizontal steel surfaces before the application of new coatings. It is also ideal for removing coatings and paint from steel surfaces. This steel blaster is equipped with an electrical device to assist with oil platform blasting. Blastrac EBE 350EX is equipped with an explosion proof electrical panel Ex II 2G Ex db IIB+H2 T5 Gb (IP66) and non-sparking electrical motors.

### Easy to manoeuvre

The machine is equipped with an independent electric drive motor on each rear wheel to make it ergonomically easy to use. They also improve productivity and promote a more even and consistent blast pattern and surface profile.

### Explosion proof enables usage on oil platforms

Blastrac EBE 350EX is equipped with an explosion proof electrical panel (IP66/67) / (EXD II 2G d II B T4) and a non-sparking electrical motors.

### Work virtually dust free: no image

The Blastrac EBE 350EX steel blasting machine has to be connected to the Husqvarna Blastrac DC 350EX industrial dust collector to create a closed circuit. This means that you are able to work virtually dust free, creating a better working environment.

### Intuitive and ergonomic control panel

A user friendly control panel with functions that are easy to reach and monitor enables smooth control and operation.

## FEATURES

- Work virtually dust free: no image
