

## Husqvarna Blastrac 1-8DPS30

The Blastrac 1-8DPS30 walk-behind shot blasting machine is optimal for small to medium-sized jobs. It is very easy to operate and handle. The machine's self-propelled operation improves productivity and features drive controls on the steering handle. It is ideal for cleaning and preparing surfaces such as concrete and asphalt before the application of a new coating. It is also capable of preparing steel surfaces.

### Option of 1 or 3 phase

This heavy duty professional machine is available either in 230 V (easy to plug on most jobsites) or 400 V.

### Self-propelled for your comfort

The machine is equipped with a drive motor for ease of use. It also improves productivity and promotes a more even and consistent blast pattern and surface profile.

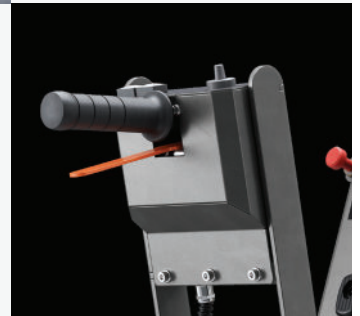

### Work virtually dust free

The shot blasting machine has to be connected to a Husqvarna industrial dust collector to create a closed circuit. This means that you are able to work virtually dust free, creating a better working environment.

### Ergonomic

This self-propelled shot blasting machine features drive controls on the steering handle.

## FEATURES

- Work virtually dust free
- Self-propelled for your comfort
